	Initial Cost		Pigment \$10-42, need primer, base, finish coat, sealer
	Resource Savings		
HEALTH	Installation Toxins		Non-toxic
	Manufacturing Toxins		Minimal
NOTES	Company Profile	<p>American Clay hands-on workshops are available in various locations around the country. Natural clay maintains an incredibly dense molecular structure and shape, giving it the capacity to produce a self-generated negative charge upon hydration. They will help neutralize the electromagnetic effect created by computers, appliances and synthetic plastics, but also will help eliminate static charge on walls.</p>
